Pavel Kirin

Junior C++ Developer

About me

I am a student of School 21 (Ecole 42 in Paris) and I'm interested in software programming, algorithms, optimizations, mathematics and a little bit of Deep learning.

Looking for a job, improving my C++ skills. Check out GitHub for my projects!

Employment History

Junior C++ Developer at Soft Building, Saint Petersburg

September 2021 – January 2022

My team and I developed and maintained software for internal use in the company like parsers, web scrapers and other things.

Half of projects are written in C++20 standard, for creating another half Node, TS, and C# were used.

Education

42cursus, School 21, Moscow

August 2020 – Present

Programmer courses in School 21 (Ecole42 in Paris). List of interesting projects see at my GitHub.

Improved skills:

[C/C++], [OOP], [STL], [Multi-threading], [IPC], [Algorithms], [Linux], [Git], [Reading manuals]

Bachelor, Moscow Aviation Institute, Moscow

September 2019 – December 2021

Unfortunately, I had to drop out of Moscow University in the 3rd year due to the poor quality of the educational program.

Improved skills:

[Pascal], [C/C++], [IPC], [Mathematics], [Algorithms]
